

HIP

Elinor is an executive chair result of a pioneering vision of contemporary office furniture, characterized by a high level of aesthetic quality. It has an elegant base in die-cast aluminium, with refined sinuous lines. A weight-activated synchro-tilt mechanism integrated in the upholstered seat allows the tilting to be self regulated according to the user's body weight, ensuring that the back is kept in the most comfortable position. Maximum comfort is guaranteed also by the polyurethane injected foam on both seat and back. A light strong armrest in die-cast aluminium defines the base of the backrest with its flowing line, accentuating the attention to detail that characterizes this unique chair.
